PERSONAL STATEMENT

I am a twnety-two year old student at the University of Florida currently enrolled at the Digtial Worlds Institute with the interest of earning a degree in Digital Arts and Sciences. I love everything that has to do with videography, programming, graphic design, and game design.

I have minimal experience in freelance, but I do work on projects outside of school that mainly revolve around my talents as a video editor and graphic design artist.

I have many different interests, but they all follow the same driving force that is my determination to fulfill my vision.
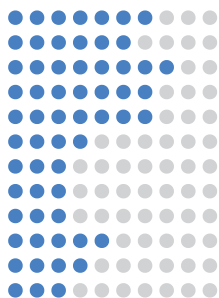

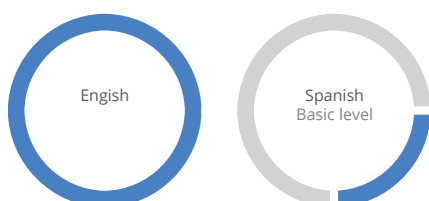

MY SPECIALITIES

Logo Design

Video Editing

Game Dev
